

Making your own Crafty Cupcake Cups it's so easy with Brother's New ScanNCut!

This project was
created on a
Brother ScanNCut

Tip

Ensure your blade and pressure is adjusted depending on the medium you are using. E.g. for standard scrapbooking paper the cut pressure should be 0 and the standard blade setting should be 2.

*Blade and pressure settings may vary according to personal experience

Materials

- 12" x 12" (30.5cm x 30.5cm) Paper of your choice
- Brother ScanNCut
- Cupcake cup template

Assembly

1. Download and print the cupcake template.
2. Select scan, scan-to-cut data and then scan your template.
3. Select option 2 (middle) – region detection.
4. Use the stylus pen to touch and drag it around the screen to trim the cutting lines to be saved as data, and then touch the "save" key.

5. Select the destination where the data will be saved (machine memory or USB drive) and press OK to finish saving the template.
6. Select pattern and then "saved data", select where you saved your template.
7. Retrieve your design and select OK, then select cut.
8. Boila!! Your cupcake cup is finished.
